

◆ **Arrays & Strings (most asked)**

1. Find the maximum element in an array.
 2. Reverse an array without using extra space.
 3. Find duplicates in an array.
 4. Find the second largest element in an array.
 5. Check if a string is a palindrome.
-

◆ **Searching & Sorting**

6. Explain Binary Search and its time complexity.
 7. Difference between Linear Search and Binary Search?
 8. Implement Bubble Sort and explain its complexity.
 9. What is Quick Sort and why is it faster?
 10. What is Merge Sort?
-

◆ **Linked List**

11. What is a linked list? Types?
 12. Reverse a linked list.
 13. Detect a loop in a linked list.
-

◆ **Stack & Queue**

14. What is a stack and its applications?
 15. What is a queue and types (simple, circular, priority)?
-

◆ **Trees & Graphs (important for top companies)**

16. What is a binary tree?
 17. Difference between BFS and DFS?
 18. What is a binary search tree (BST)?
-

◆ **Advanced Problem Solving**

19. What is dynamic programming?
20. What is time complexity and Big-O notation?
