

◆ Basics (you must be crystal clear)

1. What is DevOps and why is it important?
 2. Difference between DevOps and Agile?
 3. What are CI/CD pipelines?
 4. What is Infrastructure as Code (IaC)?
 5. What is the difference between Continuous Delivery and Continuous Deployment?
-

◆ Linux & System Fundamentals (non-negotiable)

6. How do you check system performance in Linux?
 7. Difference between process and thread?
 8. What is a cron job?
 9. How do you manage file permissions in Linux?
 10. What is SSH and how does it work?
-

◆ Version Control (Git is your backbone)

11. What is Git and why is it used?
 12. Difference between `git pull` and `git fetch`?
 13. What is branching strategy (GitFlow)?
 14. How do you resolve merge conflicts?
-

◆ CI/CD Tools (this is where companies test you hard)

15. What is Jenkins and how does it work?
 16. What are stages in a CI/CD pipeline?
 17. How do you automate testing in CI/CD?
-

◆ Containers & Orchestration (modern DevOps core)

18. What is Docker and why do we use it?
19. Difference between Docker and Virtual Machines?
20. What is Kubernetes and why is it needed?
