

◆ Core OOP Concepts (must be perfect)

1. What are the four pillars of OOP?
 2. Explain **Encapsulation** with a real-world example.
 3. What is **Inheritance** and its types?
 4. What is **Polymorphism** (compile-time vs runtime)?
 5. What is **Abstraction** and why is it important?
-

◆ Classes & Objects (foundation level)

6. What is a class and an object?
 7. Difference between object and instance?
 8. What is a constructor? Types of constructors?
 9. What is `this` keyword?
 10. What is method overloading vs method overriding?
-

◆ Advanced OOP Concepts (where interviews get serious)

11. What is an abstract class?
 12. What is an interface?
 13. Difference between abstract class and interface?
 14. What is multiple inheritance and how is it handled?
 15. What is composition vs inheritance?
-

◆ Memory & Design Understanding

16. What is a destructor?
17. What is dynamic binding (late binding)?
18. What is coupling and cohesion?
19. What are access modifiers (public, private, protected)?
20. What are SOLID principles?
